SUMMARY

Experienced Full Stack developer specializing in building robust and scalable systems using cutting-edge technologies. With a strong proficiency in **Java**, **Spring Boot**, and **Microservices architecture**, I bring a solid foundation to the table. Over 3.5+ years in the field, I have honed my skills in crafting efficient **Database designs** and **Restful APIs**, ensuring seamless data flow and interaction. My passion lies in developing Microservices-based solutions, allowing for modular and maintainable codebases. I thrive in dynamic environments where innovation and collaboration flourish, consistently working in harmony with cross-functional teams to deliver top-tier software products. My dedication to staying ahead of industry trends ensures that I stay at the forefront of the backend development, empowering me to create solutions that are not only functional but also future-proof.
